## OVERVIEW

# 1. OVERVIEW

Cryptocurrency has been very popular for the last few years, and many more currencies have evolved here. Cryptocurrencies have been growing in popularity in recent years. The beginning of this booming are projects built on the Ethereum platform. The Binance Smart Chain platform was born later, but it is growing extremely strongly and is currently leading in the crypto currency market due to its safety and popularity compared to other platforms. This is the reason that Zerofi is built on the BSC platform.

Zerofi is a combat role-playing NFT game built on the Binance Smart Chain platform with Zero Fee goal and Metaverse orientation. The advancing and maturing NFT market creates a favorable environment for the birth of ZeroFi. ZeroFi originally denotes "GamiFied Finance," a concept combining DeFi, NFT, and gaming. ZeroFi is a remaking of traditional gaming business models by innovating and blending NFT and games into a new application scenario. Zerofi brings players entertainment, creativity through building their own NFTs. Players can also earn extra income from playing games and from the value of their NFTs.

Certain terms have been discussed in the above passage or will be discussed in the coming passages. DeFi means decentralized finance that's the benefit of the Blockchain; that's Binance Smart Chain in our case. While GameFi means gaming and decentralized finance, that is a type of gaming known as P2E, or you can say Play to Earn. Now for the NFT's, which stands for Non-fungible tokens, we have this kind of asset, and it may be of any kind of visual media like a picture, GIF, or video that is sold against cryptocurrency.

The ZeroFi game offers a lot of modes for you to enjoy and earn. You can either P2E and other fun practices discussed in the gameplay section. With Zerofi, You can play by your own or with your friends, play anywhere and anytime you want.

NFTs have got a great global awareness in the crypto field since the last year as it enables you to trade your crypto in exchange for some media. The space enables people to show their abilities to create those attracting media to earn the crypto, and Hence:

Since NFTs enable the P2E model, ZeroFi is based on the shared recognition of their value. NFTs can generate value on their own, so the value of ZeroFi is justified by recognizing NFTs' value.

## 1.1 WHAT IS ZEROFI

Based on the Smart Chain platforms of Binance and Metaverse, Zerofi is a combat role-playing NFT game. Players will build their own character, train skills for it and create a unique value for their own character. Characters and equipment can be traded on the Marketplace through our 2 tokens, ZERI and ZEUS. Please note that you will only use these 2 currencies in the game.

## 1.2 OUR AIM

Our goal is to explore the infinite possibilities of NFT as a creativity infrastructure, subvert existing content and value sharing models with community co-creation and sharing mechanisms, so creativity and value can once again flourish in communities. Together with developers, and in a spirit of co-creation and sharing, we'll build a metaverse with universally recognized NFT assets. Thereby, players can happily relax while experiencing the game.

## 1.3 OUR IDEA

Our basic idea is to show everyone that it is possible to make money and enjoy playing at the same time with Zerofi. In addition, Zerofi also overcomes some of the current issues of games built on Binance Smart Chain, which is the low processing speed and the high fee to participate in the games.

02

# OUR FEATURES

## 2. OUR FEATURES

### 2.1 PLAY TO EARN

Your time is a valuable asset. And that's what we take care of a lot. There's a built-in function like other games that you earn but not similar other games, with Zerofi, you will earn real-time money, which is ZERI and ZEUS (2 tokens used in the game).

You might think, how is it possible to earn money by playing the game? The fact is, this is all real and true, and we are here offering you to play our character-based game and earn. So why not expose yourself to more than one task at a time. Amuse yourself by taking part in realistic combat and make money for yourself.

### 2.2. NFT MARKETPLACE

With multi-characters and equipment inventory, Zerofi is expected to bring a new experience to players. The Marketplace is where you can buy/sell characters to earn ZERI or buy/sell equipment to earn ZEUS

With the internal NFT transfer feature, players can give, receive and exchange NFT flexibly and securely.

The core strength of the character comes from your fighting skills and partly from auxiliary equipment. A character with good equipment along with skilled player will be able to win and get more rewards.

### 2.3. ZEROFI METAVERSE

We have the orientation to develop Zerofi in the direction of metaverse through the development of graphics and technology. Accompanying other Tech Corps, we want to bring players the most real feeling and experience.

Maintaining and growing the number of players is vital to every project. That's why Zerofi team always tries to update new trends, improve and build the game in line with the trend so that players always have new experiences and really enjoy the game from time to time.

## 2.4. CLAN

Clan building has been a part of game. Clan mode is necessary to keep the players of your team and group around you and let other groups/clans know about yours. Clan mode offers your clan a certain identity and enables your team to compete with the other under the clan name.

Build up your clan today and gather your friends and start playing today. ZeroFi helps you connect with others and enjoy the experience of combat beside your Family and Friends.

## 2.5. ARENA OF FAME

Every month, the top players with the highest-ranking points will be selected to participate in the championships tournament at the end of the year. It keeps you updated on everyone there to compete with you in the battlegrounds. Quest for the best urges you to compete for that one and learn more tactics to earn more. You should maintain your position to earn more and more. Become the winner of "Arena of Fame to receive worthy rewards and be honored on the PVP leaderboard system. The player staying on the leaderboard will also be receiving a different gift for different events. Follow Arena of fame and let's climb to the top ranking.

## 2.6. STAKING

By holding Zeri and NFT, you can earn additional income through staking. Featuring this feature, Zerofi not only serves as a game, but it also serves as an investment, your future asset.

The more NFTS & tokens you stake, the more rewards you will get. We will offer a variety of staking options so you can choose the one that works best for you.

03

**GAME PLAY**

## 3. GAME PLAY

With ZeroFi, you can choose to play from many different game modes. You can play solo, play with friends (clan mode), fight monsters, or fight the big boss together. Besides, special modes such as Mystic lands and more are to come soon. The choice is yours for entertainment and extra income. You must own at least one character (NFT) to join the game. ZERI allows you to either buy it directly or collect NFT pieces for free to own it. Once you have collected enough NFT pieces, you can combine them to own them. By owning only one character, players can participate in the game and earn rewards.

### 3.1. SOLO MODE

The solo mode has been the only mode in the old offline games. This mode proves to be a way to showcase your bravery, skill, and stamina to compete with all the players in the lobby alone. You will participate in a battle with 5 other players in 2 minutes. The top 3 players with best skills will receive the rewards.

### 3.2. TEAM MODE

In team mode, you can dive the match with your friends, and you can challenge others to compete with you. 3 players will form a team and the team battle will last for 2 minutes. The reward is only for the winning team. So, improve your skills, choose the right teammates and stay united to bring victory to your team.

### 3.3. ZOMBIE MODE

Zombie modes have been a part of the fun in almost all games. The zombie mode that we offer is far better than the games of its kind. Most of the games of such kind still don't have such a mode. You can enter in the Zombie mode either with your clan or you can dive in alone to compete.

You must survive waves of zombies to obtain in-game rewards (weapon shards, tokens, equipment shards)

### 3.4. BIG BOSS

The big boss is a very strong creature, and it's really difficult to defeat it. It's intentionally made powerful for the players to damage it and earn in-game points. The idea behind the big-boss was brought in from the old games where you were supposed to defeat a huge monster to move to the next stage or win the game and end the storyline. Now you will have it every day before you to defeat that is seemingly impossible, and it is a chance for you to earn more than usual. It seems like a golden opportunity waiting for you to grab.

Remember, the more effort you put in, the more you get the yield, and that's true in every industry. Give your best to defeat Big Boss so that you can get a special reward and other rewards that are waiting for you right there.

### 3.5. MYSTIC LANDS

You like to solve mysteries? It's for you the mystic lands waiting for you. During your course of playing the normal mode in the game, you need to collect the pieces for the mystic lands, and that is when you complete all the pieces, you merge them to create the entry coupon for the mystic land in a different game mode. The mode is different from the normal modes that you will have been playing till then, and this is different because it contains whole new maps and a whole new biome of different creatures in there. But as a part of this, your aim will still be focused on the rewards. Let's look forward to the rewards in special mode because it's a big surprise and it will not let you down.

04

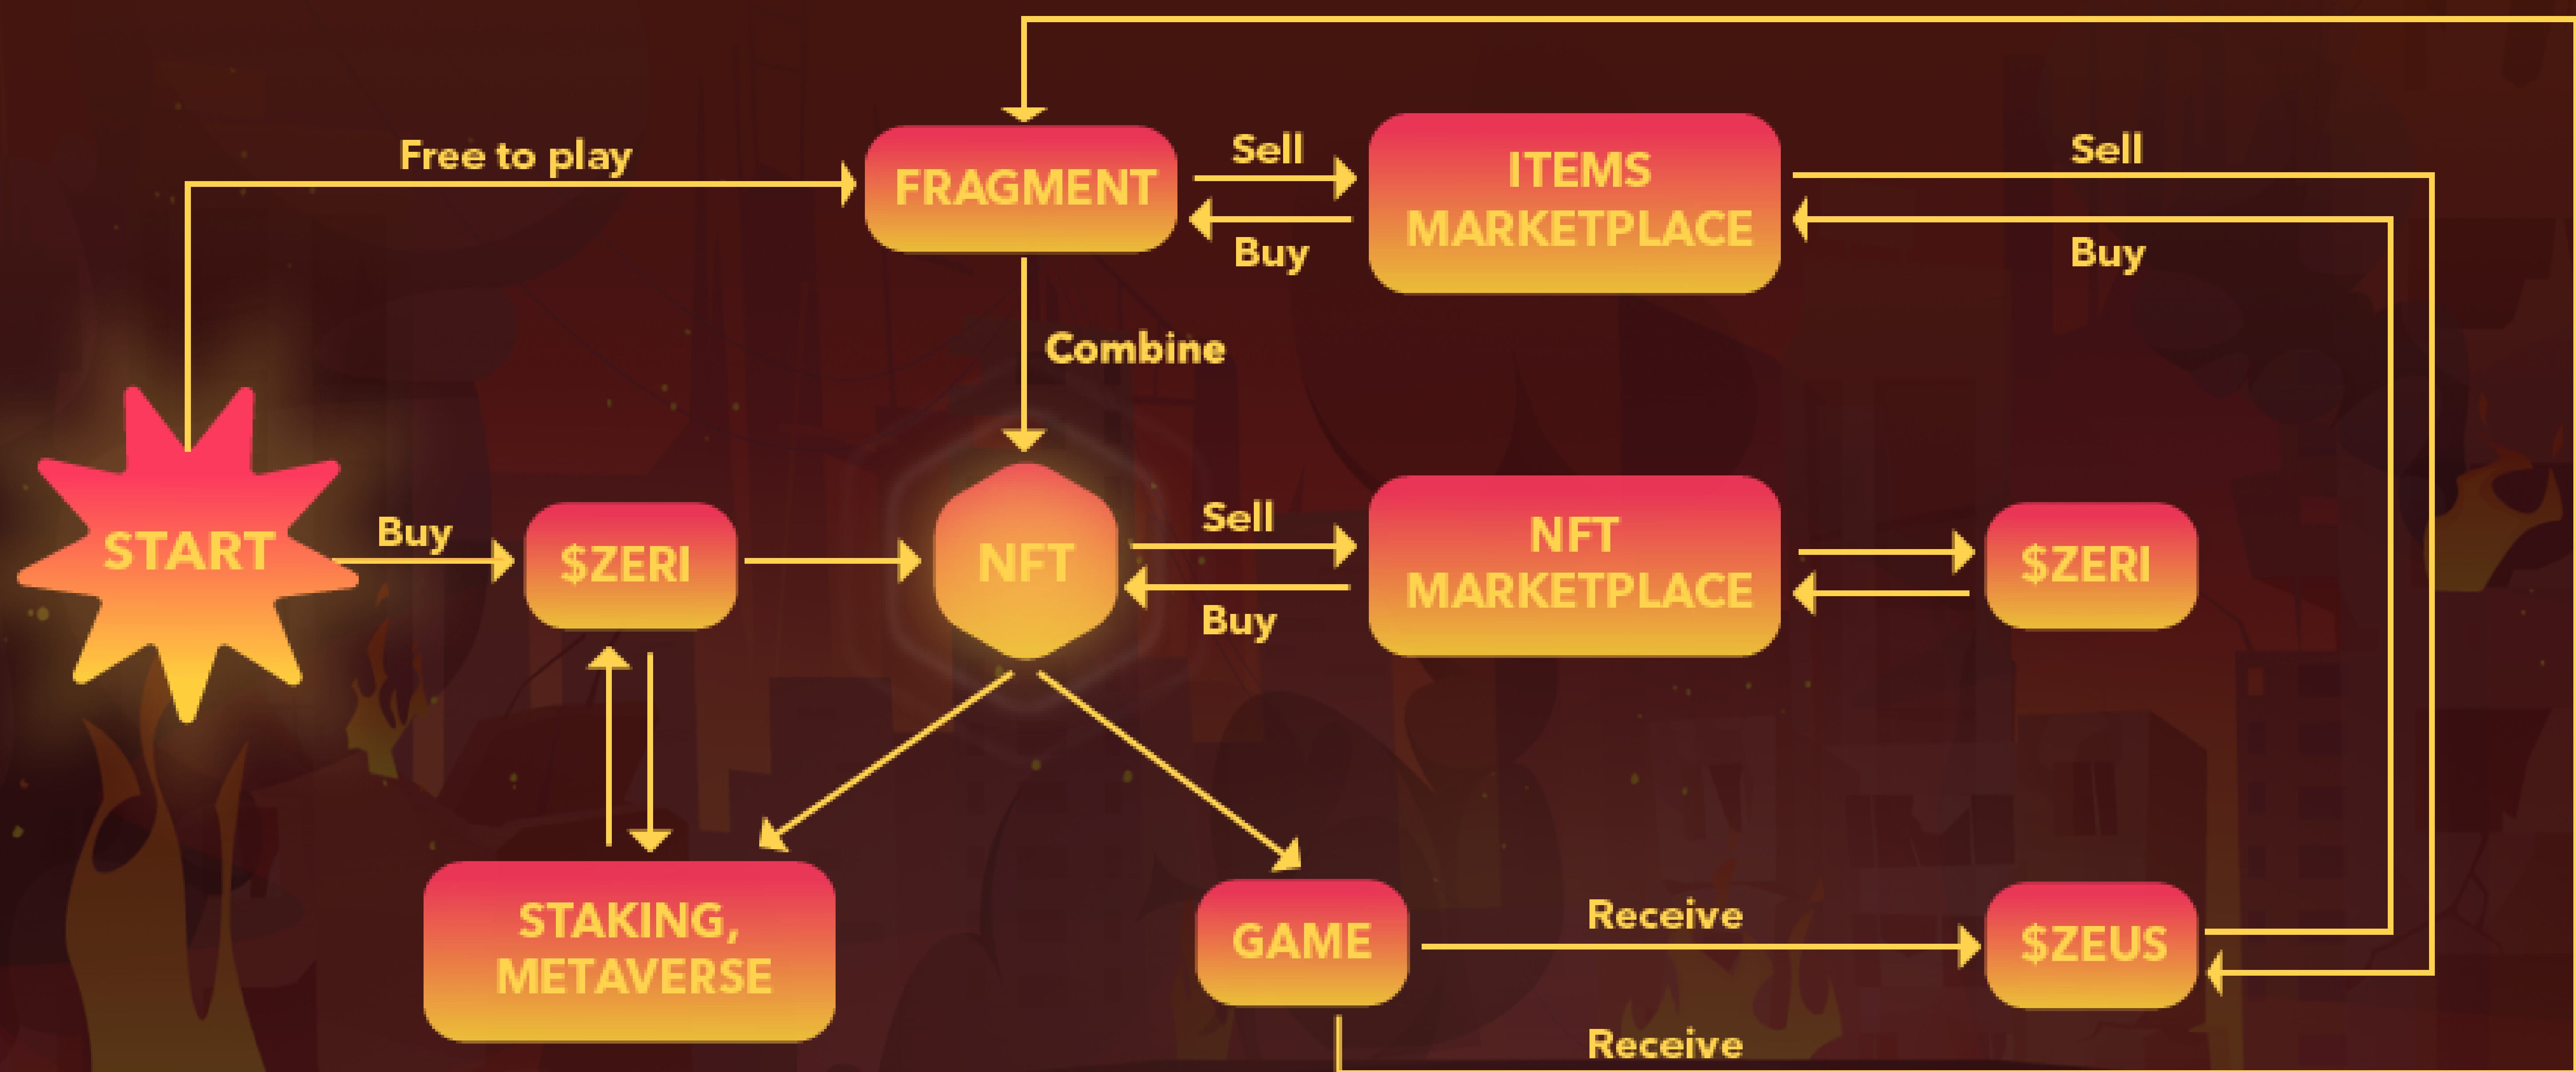

# TOKEN OPERATION MECHANISMS

## 4. TOKEN OPERATION MECHANISMS

In our ecosystem, there are two tokens, ZERI (Main Token) and ZEUS ( Game token ). This mechanism can be illustrated and easily understood through a flow chart.

You can either start from zero or invest in your account, but either way, your destination will let you find itself.

Tokens can only be obtained through release-stake-withdrawal, the only stable mechanism for players to obtain tokens in games. Tokens are preserved in value and can be continuously released through this mechanism over a long period. Based on the platform's revenue, a set quantity of coins will be released each month, with the specific quantity determined by algorithms.

## 4.1. ZERI

The total supply of tokens is 500 million, which is good for its startup and you can also check the division of this supply in the coming tokenomics section.

ZERI is the main token and only gained through staking or winning in special modes (game mode with high requirements for players). The rate is calculated properly in order to stabilize the price for a long time and avoid inflation.

Some features of the ZERI token in the game:

- These tokens can be used to purchase NFTs directly. The option enables you to deal directly in the world of cryptocurrency.
- Rewards when Staking NFT, Staking ZERI or play to earn in special modes.

## 4.2. ZEUS

The creation of daily ZERI in the market will cause the price of the token to slide down, and also it will affect the NFT market that the prices of NFTs will also go down. And if its inverse is done, the prices will rise so much that the markets will be inaccessible. Therefore, a solution is needed to control inflation and stabilize the price of the main token. That's why ZEUS (game token) was created.

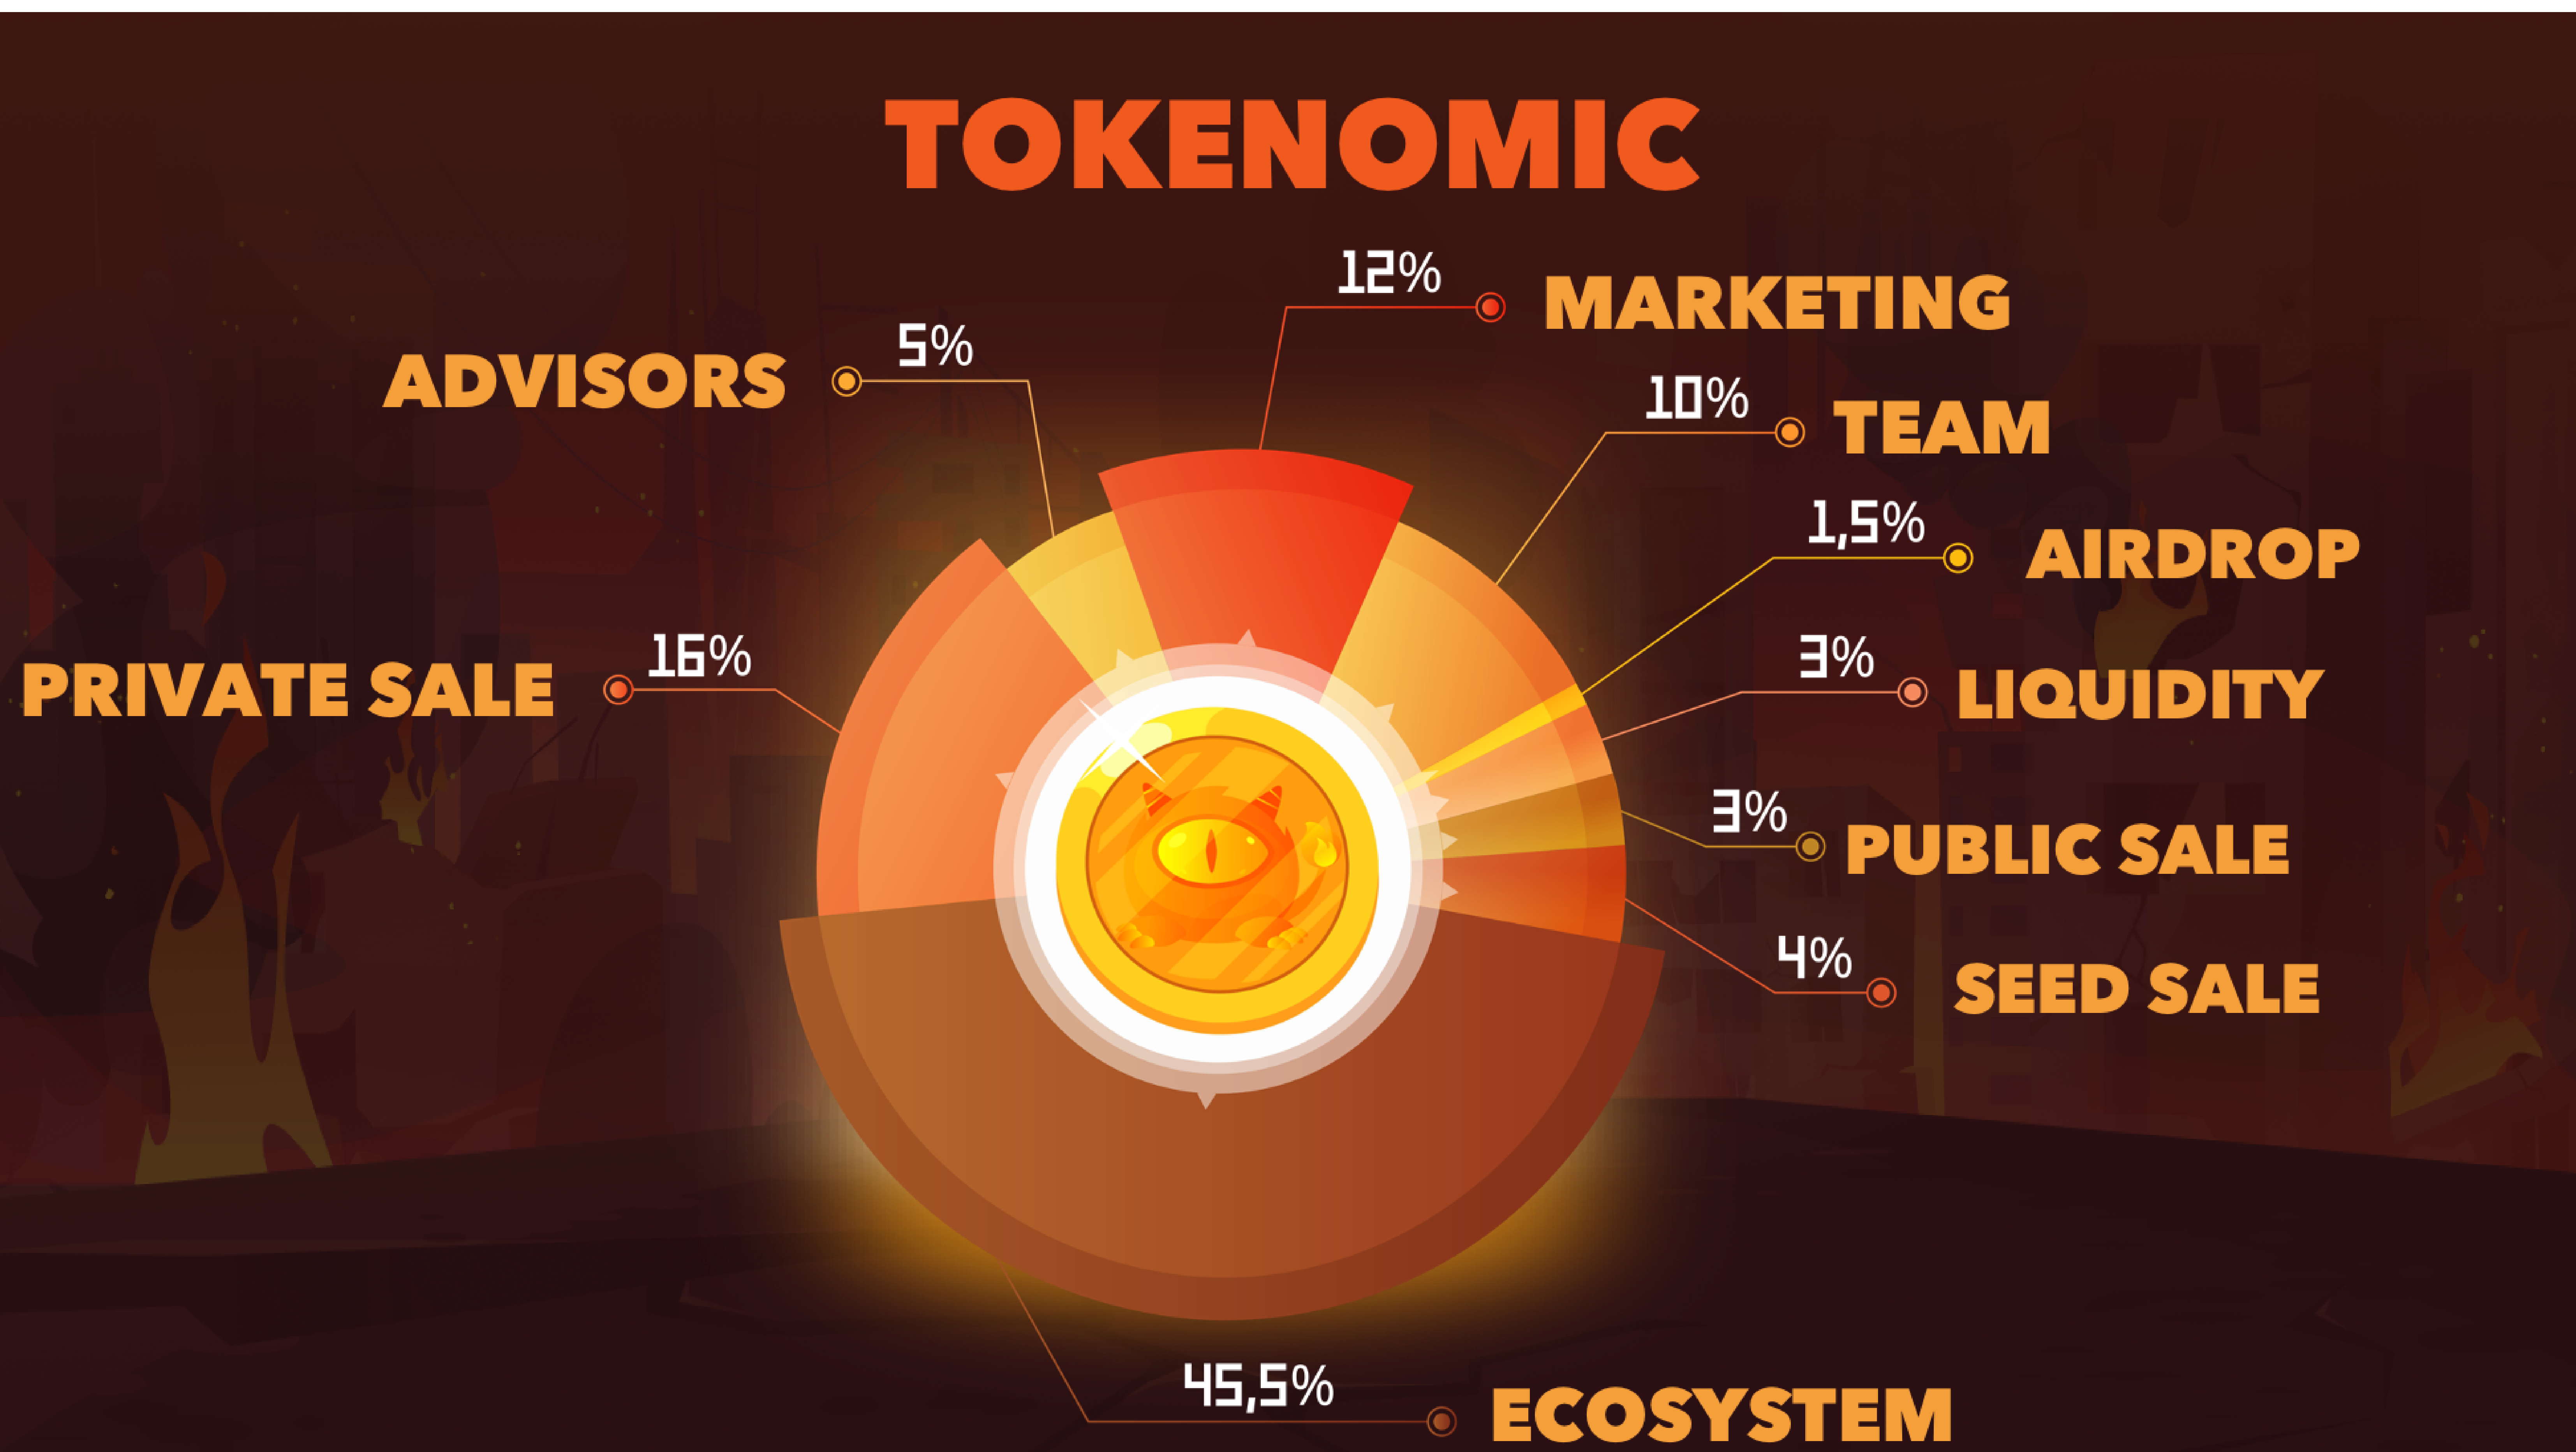

ZEUS has the following functions:

- Players can purchase in-game items with this currency; this is like different in game currencies.
- Playing games (PVP, PVE) will reward you ZEUS too that you can use in the in game shop, so it's also a kind of engagement for the players because it will have items that one cannot purchase with other tokens.
- ZEUS allocation: Unlimited supply; first 100 million ZEUS will be added to the ZEUS/BUSD pair. That will provide a great boost for the first start-up.

## 4.3 TOKENOMIC

- **4%** of the tokens will be available for seed sales.
- **16%** of the tokens will be available for private sales.
- **3%** as Public sale.
- **3%** of the tokens will be used to provide liquidity.
- **45,5%** of the tokens are reserved for the ecosystem.
- **10%** of the tokens will go to the developing team.
- **5%** of the tokens will go to the advisor.
- **12%** of the tokens will be used for marketing, acquisitions, & licenses.
- **1,5%** of the tokens will be used for airdrop.

## 4.4. DETAILED TOKEN METRICS

	DISTRIBUTION	PRICE	TOTAL SUPPLY	COLLECTED USD	VESTING SCHEDULE
SEED SALE	4%	0.02	20,000,000	\$400,000	5% at TGE, 2 month cliff then 5.28% monthly
PRIVATE SALE	16%	0.025	80,000,000	\$2,000,000	7% at TGE, then 7.75% monthly
PUBLIC SALE	3%	0.0275	15,000,000	\$412,500	15% at TGE, then 17% monthly
STAKING, LIQUIDITY, MM, & INCENTIVES	3%		15,000,000		50% at TGE, then 10% weekly (in 3 weeks), 20% at TGE+1 month
ECOSYSTEM	45.5%		227,500,000		0% at TGE, 2% at TGE+1 week then 2% monthly
TEAM	10%		50,000,000		0% at TGE, 12 months cliff then 8.33% monthly
PARTNERS, ADVISORS, & CONSULTANTS	5%		25,000,000		0% at TGE, 20% at 12 months cliff then 8.33% monthly
MARKETING, ACQUISITIONS, & LICENSES	12%		60,000,000		0% at TGE, 20% at TGE+3 weeks then 20% quarterly
AIRDROP	1.5%		7,500,000		0% at TGE, 20% at TGE+1 weeks, 20% at TGE+1 month then 20% Quarterly
TOTAL	100%		500,000,000		
MARKET CAP AT TGE	\$243,375				

05

**ROADMAP**

## 5. ROADMAP

### 5.1. Q4 2021

- **Story and character Build Up:** The story for the game will be available in the story mode. There will be certain characters in the game that will have successive differences from one another for the characters. Each character will have its powers and abilities.
- **Deploy contract, Audit Contract:** Contract will be checked carefully many times by technical team and independent audit company
- **Beta Launch:** There will be a test launch for a short time to check any runtime issues that will be actively solved by the ZERI Team that will put its hard effort into removing those glitches.

## 5.2. Q1 2022

- **Seed and Private Sale:** The seed and private round are organized with the purpose to provide resources and support throughout the development process of the project. We are seeking suitable investors and advisors to accompany us.
- **Public Sale:** The project will be open for public sales on various launchpad platforms.
- **NFT Marketplace Launch:** After the launch of the platform, we will be starting to make the NFT's marketplace active so that you can buy and sell NFT.
- **Official Game Launch – Solo Mode, Team Mode:** After having the backend ready now it will be the time when the game will be made public to you, and it will first be launched with two of its modes one will be solo mode, and other will be team/clan mode.

## 5.3. Q2 2022

- **PvE 1.0 Launch (Zombie Mode):** After testing the previously launched modes that have been tested and modified duly, we will be deploying the next mode that will be the zombie mode.
- **More Partnerships Connected, Marketing Expansion:** When our system is running smoothly, we will focus on its social media marketing to urge more investors to partner with ZERI. After that, we will be putting a lot more effort into the marketing campaigns through ads on social media and websites.
- **Staking Function:** Staking function is launched with various options and corresponding ROIs.

## 5.4. Q3 2022

- **Top Exchanges Listing:** We will apply for listing on some of the top centralized exchanges.
- **PvP 2.0 Launch:** continue to develop, upgrade new version, fix bugs (if any) from PvP 1.0
- **PvE 2.0 Launch (Monster Mode):** Then after the Multiplayer mode, we will be introducing the new game mode in PVE that will be the monster mode that is, in fact, a new way for you to earn more. The monster will appear once a day, and you will have a chance to fight the monster to get the special rewards for all the damage you will deal the monster.
- **Metaverse Integration:** After the game is developed to its final, we will be going for the integration of metaverse for our game. It will move towards the world of a decentralized virtual world.

## 5.5. Q4 2022

- **Diversify Equipment System, Marketplace Upgrade:** Perform changes, upgrade equipment system and Marketplace, bring a new experience to players.
- **First PvP Championship:** After the players have got the know-how about gameplay and a large gaming pool is developed, we will be launching a championship for PvP.
- **Global PvP Tournament:** After winning the championship, the winners from different regions will be called in for the Global tournament. The players from different regions will be competing globally with each other. There will be the main leaderboard of the global tournament containing the world ranking of the players.
- **Metaverse Launch:** After such a successful era of the world, we will be heading towards the metaverse launch that will evolve the game off the screen to the virtual world

06

**DECLARATION**

## 6. DECLARATION

This document is intended solely for recipients who have requested information about the program, and it does not constitute any future investment guidance, a contract, or engagement.

Participants in the ZERI Token Distribution Project understand and accept the project's risks and are willing to bear those risks personally. Neither the project team nor its members will accept responsibility for any direct or indirect losses that may arise from its implementation. ZERI tokens are cryptographic codes used in transactions and do not represent equity, earnings rights, or project control. In light of the many uncertainties surrounding the digital currency itself (including, but not limited to, the general regulation of digital currencies in different countries, fierce competition in the industry, and the technical loopholes of the digital currency itself), we cannot guarantee the success of the project. This project faces a risk of failure, which means the project's tokens could become invalid as well. Even though the team is committed to working hard to solve any problems that may arise, there are still uncertainties that will affect the project in the future. It is important to remember that support for and participation in this project must be rational and based on a full understanding of the risks of Blockchain. All operations comply with all local laws, regulations, and regulatory requirements. Whenever a legal issue arises, it is advisable to speak to a local attorney.

Members of the ZERI community are entitled to hold additional ZERI tokens or to relinquish them in the future, regardless of whether they have acquired them. Token holding also implies the right to use and spend smart contracts on the Zeri blockchain platform. The ZERI Foundation makes no guarantees or tunneling to ZERI purchasers to the extent permitted by law. Additionally, purchasers should know that there are no returns or refunds after purchasing ZERI tokens. A dispute will be resolved by negotiation between the parties involved by the contract. Legal action will be taken, if negotiation fails to resolve the dispute.
